

ASP INFRASTRUCTURE

Hosting Services Designed for Safety, Security and Scalability

Interactive Advisory Software

Key Benefits:

- Automatic access to market leading equipment
- Effortless hardware, network and software upgrades
- No installation, thus reducing the time it takes to deploy solutions
- Eliminates the cost of needing to hire support staff and acquire equipment to support a 24/7 web environment
- Predictable cost that makes budgeting easy and accurate
- 128-bit SSL encryption and private keys from VeriSign Corporation
- SAS No. 70. (Statement on Auditing Standards) IAS has demonstrated controls and safeguards to host or process data belonging to their customers. The issuance of a service auditor's report prepared in accordance with SAS No. 70 signifies that IAS has had its control objectives and control activities examined by an independent accounting and auditing firm.

The IAS hosting facility has been engineered to avoid any single point of failure in connectivity, power or HVAC. IAS accommodates the high-availability demands of its customers by utilizing multiple vendor backbones to ensure data reaches your firm in the fastest, most efficient manner possible. At the core of its CISCO network is a redundant Fiber ATM connection directly connected to the Waterbury ITZ \$5 Million self-healing ring. Rest assured while you are out fostering new clients and growing existing business lines, IAS ensures that your technology backbone continues to support you every step of the way.

Facility Security

IAS takes security seriously. The hosting facility is located on the fifth floor of its Waterbury, CT location with key code access in and out. IAS monitors this location 24/7 with a state of the art Intrusion Detection System (IDS) and Sensor Security system.

Software Security

IAS uses SSL for transferring of html data to be viewed. SSL technology ensures all data is 128-bit encrypted protecting it from third party disclosure. Additionally, all users are required to use unique user names and passwords for access to the system. The databases are stored behind internet firewalls, therefore making the databases inaccessible through the internet.

Room to Grow

IAS servers are customized, managed servers, meaning that the system is made just for you and designed to grow with your needs. IAS maintains and keeps pace with the latest technology ensuring instant upgrades to faster processors, extra disk space and more bandwidth.

Routers

The IAS network has been designed to accommodate the high-availability demands of its customers. IAS utilizes multiple vendor backbones to ensure data reaches you in the fastest, most efficient manner possible. It runs BGP4 for best case routing over Cisco routers and switches with security measures through PIX firewalls.

Backup Power

IAS has engineered the hosting center to avoid any single point of failure in our connectivity, power or HVAC. A 95kw natural gas powered generator on the roof of the building provides emergency backup. Also, natural gas has many advantages to diesel or regular gas generators with the most significant being a constant supply of natural gas with no worries about running out of fuel.

Disaster Recovery Site

At the IAS Headquarters in Atlanta, Georgia, IAS maintains a replicating site with complete redundancy. IAS can make the secondary site hot in short order so minimal disruptions occur, should something catastrophic occur to the IAS Northeastern facility. Additionally, each site maintains daily backup tapes from the data center and stores them offsite at Iron Mountain. Disaster recovery personnel have specific procedures and check points to ensure all backup processes happen on a daily basis without interruption.

About IAS

Interactive Advisory Software is the first company to offer a fully unified, browser-based technology solution containing comprehensive financial planning, portfolio management, and client management software all in one unique package. From sales to support, IAS is focused on increasing your satisfaction and providing software solutions that help you achieve your firm's goals.

IAS: The only unified wealth management solution.
